About us

To start with, we've been looking for high-quality woodcarving tools for quite some time. The situation didn't fit our needs at all, either the products were too expensive and the quality was low or it was the complete opposite, we hit on the great quality items for the huge price. So we didn't meet with the success in finding the appropriate products, for which the price corresponded the quality. That's why we managed to set up our own company called BeaverCraft, and in the latter 2014 we hit the market.

From the very first day, we manufacture the products that go with already mentioned three terms such as quality, reliability and the satisfying price.

We are open to discovering new horizons, self-development and company amendment. If you're into the same goals, let us know. We'd be happy to have a talk and share some opinions on the matter!

WOOD CARVING KNIVES

C1 – Small Whittling Knife

- Total length – 165 mm (6.49")
- Blade length – 60 mm (2.36")
- Blade width – 15 mm (0.60")
- Handle length – 105 mm (4.13")

This general purpose carving knife gives the carver a different approach to a detail or paring cutting. The woodcarving knife is a tough, well-made tool which is great for whittling and marking, chip carving, general woodworking, and handicrafts. It offers an unbeatable blade for carving delicate curves and larger cuts.

C1 Kid – Whittling Knife for Kids and Beginners

- Total length – 155 mm (6.10")
- Blade length – 50 mm (2.16")
- Blade width – 15 mm (0.59")
- Handle length – 105 mm (4.13")
- Handle material – Ashwood
- Sheath material – Genuine leather

Despite the apparent safety, this woodworking knife with a robust carbon steel blade is functional and sharp. It is perfect for all whittling jobs and is a one-stop solution for many craft hobbies. With such a knife, your kid can effectively carve wood and create easy whittling projects for beginners.

It comes with a genuine leather sheath and two rolls of cut-resistant tape to provide maximum safety and protection for your kid.

C2 – Roughing Knife

- Total length – 165 mm (6.49")
- Blade length – 40 mm (1.57")
- Blade width – 13 mm (0.51")
- Handle length – 120 mm (4.72")

This knife features a straight blade for the heavier stock removal with a rounded durable point. The cutting knife is a general purpose carving knife, great for beginners. Being super sharp, the wood carving knife allows cutting both soft and hardwood. The Ashwood handle is designed to match the blade style and assure tool control.

C3 – Small Sloyd Carving Knife

- Total length – 165 mm (6.49")
- Blade length – 40 mm (1.57")
- Blade width – 13 mm (0.51")
- Handle length – 120 mm (4.72")

The sloyd knife is beveled on both sides and is a good all-purpose carving knife that can handle a wide range of carving tasks: chip carving, whittling, can be used as a detailed knife in some wood carving projects. The convenient handle is faceted with multiple control points to allow it to be held in a variety of comfortable positions.

C4 – Whittling Sloyd Knife with Oak Handle

- Total length – 200 mm (7.87")
- Blade length – 80 mm (3.14")
- Blade width – 17 mm (0.66")
- Handle length – 120 mm (4.72")

The whittling sloyd knife is designed for wood cutting and roughing wood out. The knife features a straight blade for the heavier stock removal with a rounded durable point. With this knife you can cut both soft and hardwood, this sloyd knife can be used for cutting out spoons, scoops, walking sticks, slingshots and more. The handle is made of oak wood and covered with natural linseed oil, the handle feels good in the hand.

C4M – Whittling Knife

- Total length – 185 mm (7.28")
- Blade length – 80 mm (3.14")
- Blade width – 17 mm (0.66")
- Handle length – 105 mm (4.13")

The knife is designed for whittling as well as for general woodworking and handicrafts. The straight blade can accommodate larger stock removal if needed. For added strength, the tang of each knife extends completely through the handle. The handle is beautifully made of conditioned Ashwood.

C5 – Wood Carving Bench Knife

- Total length – 155 mm (6.10")
- Blade length – 50 mm (1.96")
- Blade width – 15 mm (0.59")
- Handle length – 115 mm (4.52")

Multi-purpose knife is used for carving and utility purpose. It has a more rounded point which is very durable. This woodcarving knife is great for beginners. The knife offers a superior sharpness for all your crafting needs. The Ashwood handle is convenient and feels good in the hand during carving.

C6 – Small Chip Carving Knife

- Total length – 155 mm (6.10")
- Length of the cutting edge – 25 mm (1")
- Handle length – 120 mm (4.72")
- Handle material – Ashwood
- Blade thickness - 2 mm (0.04")

This Small Chip Carving Knife is a short-bladed knife used to make both smooth and curved geometric shapes, cut out triangles, squares, lines, carve letters, caricatures, and create different intricate designs in wood and more. Designs carved in this style are cut into the wood, or incised, not relieved. The curved ergonomic ashwood handle allows cutting longer with less hand fatigue.

C7 – Small Detail Wood Carving Knife

- Total length – 160 mm (6.3")
- Length of the cutting edge – 40 mm (1.57")
- Handle length – 105 mm (4.13")
- Handle material – Ashwood

This detail knife has a very thin point of the knife for making the most narrow cuts accompanied by detailing. The tool has a flexible blade, which is excellent for producing some works of fine detailing and greater precision. Designed for very fine delicate cuts, this fine detail knife is a great tool to help in any wood carving project.

C8 – Chip Carving Knife

- Total length – 165 mm (6.49")
- Length of the cutting edge – 35 mm (1.37")
- Handle length – 125 mm (4.92")
- Handle material – Ashwood

Designed to make geometric shapes, cut out squares, lines, carve letters, create designs in wood and more, this chip carving knife is made of holding edge steel for smoother cutting and is ready to use right out of the box. The knife features high-carbon steel and curved ergonomic ashwood handle. The tool is comfortable even after hours of carving.

C9 – Marking Striking Knife

- Total length – 145 mm (5.7")
- Handle length – 105 mm (4.13")
- Blade length – 25 mm (0.98")
- Blade width – 17 mm (0.67")

This woodcarving knife is intended for marking lines for fine joinery layout work. Also, it is designed for geometric wood carving, producing lines that help in making accurate cuts with the chisel. Used in many wood carving projects, this knife is an indispensable tool for performing woodcarving and a great addition to the toolkit.

C10 – Chip Carving Knife

- Total length – 150 mm (5.90")
- Width of the cutting edge – 40 mm (1.57")
- Handle length – 105 mm (4.13")
- Handle material – Ashwood

This C10 knife is used mainly for geometric woodcarving. It is designed for cutting geometric patterns in the wood, aligning the background with relief wood carvings and more. It has a special beveled blade shape for performing both geometric wood carving and detail woodworking. The ergonomic design of the handle fits in the hand well.

C10s – Small Chip Carving Knife

- Total length – 135 mm (5.31")
- Width of the cutting edge – 30 mm (1.18")
- Handle length – 105 mm (4.13")
- Handle material – Ashwood

With this top quality handcrafted C10s knife, the woodworker can carve geometric shapes, patterns, cut out squares, triangles, lines, and carve letters, caricatures and much more. Its high carbon steel takes a razor-edge. The Ash wood handle makes comfortable during the woodcarving.

C11 – Knife for Chip Woodcarving

- Total length – 150 mm (5.90")
- Width of the cutting edge – 35 mm (1.37")
- Handle length – 105 mm (4.13")
- Handle material – Ashwood

The C11 knife is designed for making long and short lines and other geometric elements and for execution of undercutting works. With this set, a carver can perform different geometric wood carvings, letters cuttings with different complexity. The knife is exceptionally comfortable for the beginner and also very suitable for the professional.

C11s – Small Knife for Chip Woodcarving

- Total length – 140 mm (5.51")
- Width of the cutting edge – 20 mm (0.78")
- Handle length – 105 mm (4.13")
- Handle material – Ashwood

The C11s knife is intended for geometric woodcarving, cutting out geometric patterns of any complexity, carving letters and more. The blade is small but allows surgical precision in cutting. The knife is very handy tool for carving fine detail. Ash wood handle is comfortable and ergonomic.

C12 – Skew Knife

- Total length – 160 mm (6.29")
- Length of the cutting edge – 20 mm (0.78")
- Handle length – 120 mm (4.72")
- Handle material – Ashwood
- Blade thickness - 2 mm (0.08")

This skew knife is used for taking more vertical cuts where space is limited for a conventional whittling stroke. This knife can also be referred to as a stab knife. Made of high carbon steel, the tool shank gives just enough to follow the contour of carving, eliminating the need to have a handful of traditional tools to finish a single profile.

C13 – Skewed Detail Knife

- Total length – 165 mm (6.5")
- Handle length – 105 mm (4.13")
- Length of the cutting edge – 60 mm (2.36")
- Handle material – Ashwood

The skewed detail knife is a tough, well-made tool that is used both for whittling and for chip carving, general woodworking, and handicrafts. This woodcarving knife is designed for a wood carving tool collection. The blade of the knife is narrow and pointed, designed for carving delicate curves. The high-carbon steel blade features high quality and durability.

C14 – Chip Carving Knife

- Total length – 165 mm (6.5")
- Handle length – 105 mm (4.13")
- Length of the cutting edge – 60 mm (2.36")
- Handle material – Ashwood

This woodworking knife is designed specifically for chip carving, to make both smooth and curved geometric shapes, cut out triangles, squares, lines, carve letters, caricatures, and create different intricate designs in wood and more. It offers good control during carving. This knife has a flexible blade made for producing works of fine, precision and detail. The Ash wood handle is covered with natural linseed oil and makes comfortable even after hours of woodcarving.

C15 – Detail Wood Carving Knife

- Total length – 155 mm (6.10")
- Blade length – 35 mm (1.37")
- Handle length – 115 mm (4.53")
- Handle material – Ashwood

Detail Knife has a very fine point for making narrow cuts, detailing the woodcarving project. It is made with a flexible blade which is excellent for fine detail and higher precision. The detail knife is designed for very fine delicate cuts, carving letters, creating designs in wood and more, the tool is a great help in any woodcarving project. The knife is made with edge-holding steel for smoother cutting and ready to use out of the package.

C16 – Big Roughing Knife

- Total length – 170 mm (6.55")
- Blade length – 50 mm (1.96")
- Handle length – 115 mm (4.53")
- Handle material – Ashwood

Roughing Knife features a straight blade for removing heavier stock with a rounded durable point. The cutting knife is a great general purpose carving knife especially for beginners. The supersharp wood carving knife from BeaverCraft allows cutting both soft and hard wood.

C17P – Universal Detail Pro Knife with Palm Handle

- Total length – 165 mm (6.49")
- Blade length – 40 mm (1.57")
- Blade width – 12 mm (0.47")
- Handle length – 65 mm (2.56")

The Universal Detail Pro Knife is a reliable, functional, well designed tool ideal for both the initial form of a product and removing thin layers of wood, as well as delicate processing of hard-to-reach places. The tool will cope perfectly with the thread in the areas of rounding. The knife has one round cutting edge. This delicately balanced tool works well for getting into all confined areas. The fine blade and comfortable palm handle will work well for your best carving projects.

C18 – Curved Carving Knife

- Total length – 160 mm (6.3")
- Blade length – 40 mm (1.57")
- Blade thickness – 1 mm (0.04")
- Handle length – 115 mm (4.53")
- Handle material – Ashwood

This tool is a versatile C18 curved wood carving knife designed to meet the needs of those seeking precision and control in their carving projects. With a blade thickness of just 1mm, this knife effortlessly removes excess material from your workpiece, reducing the effort needed for carving. The pointed blade tip is perfect for creating clean and precise curves in your designs, and the ashwood handle provides a comfortable grip for extended use. Whether you're a professional or a hobbyist, this knife is essential for achieving your desired level of detail in your carving projects.

DK1S – Drawknife 3mm with Oak Handle with Leather Sheath

- Blade length – 120 mm (4.72")
- Blade thickness – 3 mm (0.12")
- Handle length – 120 mm (4.72")
- Total length – 360 mm (14.17")

This handy drawknife is used to shape wood by removing shavings, works great for skinning bark and roughing-off corners. This drawknife is a perfect tool if you want to remove small slices of wood for flat faceted work. The comfortable handles are made of oak wood.

DK2S – Drawknife 3mm with Leather Sheath

- Blade length – 120 mm (4.72")
- Blade thickness – 3 mm (0.12")
- Handle length – 105 mm (4.13")
- Total length – 330 mm (12.99")

This shaving knife is designed for planing faceted parts or shaping a small circle. The blade of the draw knife has a thickness of only 2 mm since this knife is designed for finishing delicate work. You can make the cuts that are needed for the finished shape, taking less time to sand or scrape. The handles fit well, made of Ashwood.

DK3 – Drawknife with Walnut Handle in Leather Sheath

Total length – 280 mm (11.02")
Blade length – 110 mm (4.3")
Blade width – 25 mm (0.98")
Handle material – European walnut
Blade thickness – 5 mm (0.2")

This drawknife is a practical carving tool for effortless wood shaping and shaving. It is designed with a single bevel and has a razor-sharp carbon steel blade and sturdy European walnut handles, ensuring long-lasting performance and a firm and secure grip. Perfect for removing broad, long layers and leveling surfaces, this shaving knife adeptly handles bark removal without harming the wood. Use it with ease by smoothly moving the knife towards you and holding it with both hands.

SPOON CARVING KNIVES
—■—

SK1 – Spoon Carving Knife 25 mm

- Total length – 155 mm (6.10")
- Rounding diameter – 25 mm (1")
- Handle length – 105 mm (4.13")
- Handle material – Ashwood

The spoon carving knife is the excellent U-shaped utensil for making detailed cuts or rounding out bowls and spoons, kuksa or a rounded edge to add some detail to your project. The spoon carving knife is deeply curved, edged all the way to the point of the knife, and has a flat back for pushing with the thumbs.

SK1 Oak – Spoon Carving Knife 25 mm with Oak Handle

- Total length – 185 mm (7.3")
- Rounding diameter – 25 mm (1")
- Handle length – 130 mm (5.12")
- Handle material – Oak

Oak Designed to cut out spoons, bowls, kuksa, rounded edges & more, a hook knife is an indispensable tool for most of the woodcarvers. The deeply curved, single-edged blade is sharpened all the way to the point of the knife. With this hook knife, you can cut soft and hardwood. Its comfortable oak wood handle allows applying fewer efforts when carving.

SK2 – Spoon Carving Knife 30 mm

- Total length – 170 mm (6.69")
- Rounding diameter – 30 mm (1.18")
- Handle length – 105 mm (4.13")
- Handle material – Ashwood

The Spoon Carving Knife follows the goal of making the hollows of spoons and bowls, cutting out kuksa or making rounded edges. The deeply curved, single-edged blade is sharpened all the way to the point of the knife. The tang of the knife extends completely through the beautifully conditioned Ashwood handle.

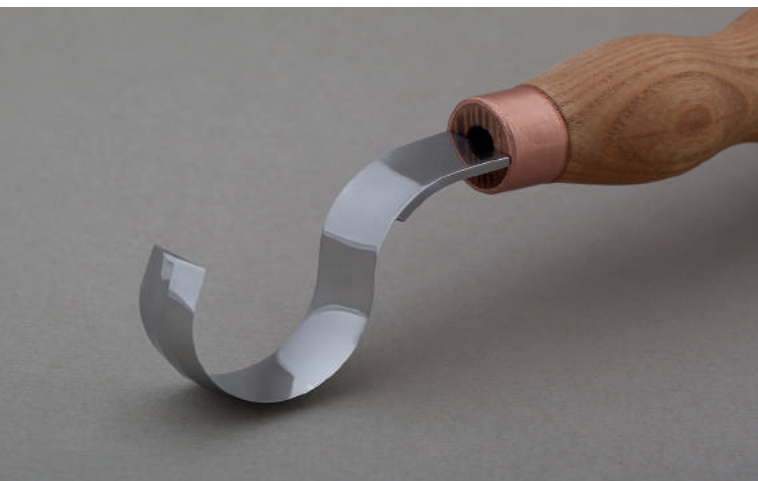

SK2 Oak – Spoon Carving Knife 30 mm with Oak Handle

- Total length – 195 mm (7.68")
- Rounding diameter – 30 mm (1.18")
- Handle length – 130 mm (5.12")
- Handle material – Oak

The hook knife is designed for carving out spoons bowls, Kuksa, spoons, other products and rounded edges to add some details to the woodcarving project. Its rounding diameter is 30 mm with a square end, which is ideal for small and middle size products. Durability enhanced with full tang. The oak wood handle fits in the hand very well.

SK2 Long – Spoon Carving Knife with Long Handle

- Total length – 365 mm (14.37")
- Rounding diameter – 30 mm (1,18")
- Handle length – 300 mm (11.81")
- Handle material – Ashwood

With this Spoon Carving Knife, the carver is able to cut out wooden spoons, kuksa, bowls and more. The spoon for carving has a long handle, which allows applying fewer efforts even and makes comfortable during carving. With the hook knife, the carver can cut both hard and soft wood. The doubled-edged hook knife is designed for right- and left-handed people.

SK3 Long – Large Spoon Carving Knife

- Blade length – 105 mm (4.13")
- Rounding diameter – 90 mm (3.54")
- Handle length – 300 mm (11.81")
- Handle material – Ashwood

This Large Spoon Carving Knife is ideal for carving spoons, bowls, ladles and other deep hollowed items. The hook knife features a half-round, double-sided blade with a square end. This spoon knife has a long blade that cuts deep grooves. Due to its long handle, the hook knife is comfortable even after hours of continuous carving. Designed for right- and left-handed people.

SK4S - Spoon Carving Knife Open Curve

Left-handed version available

- Blade length – 60 mm (2.36")
- Handle length – 200 mm (7.87")
- Handle material – Oak
- Sheath material – cowhide leather

The long-curved knife was created especially for making great woodcarving spoon, kuksa, bowls. Now you're to get not only spoon knife but genuine leather sheath to carry your spoon knife everywhere. The hook knife has an ergonomic handle and it makes possible to carve longer and don't get tired. Double-bevel blade of the spoon knife is made of high carbon steel so the curved blade knife will work for a long time.

SK5S - Spoon Carving Knife Deep Cut Bevels

- Blade length – 85 mm (3.35")
- Handle length – 200 mm (7.87")
- Total length – 255 mm (10.04")
- Handle material – Oak

Spoon Carving Knife Deep Cut Bevels will give you excellent carving experience for your spoon, kuksa and bowls projects. Double-side bevels allows you to make deep smooth cuts with slight and controlled moves. Both sides edges are razor sharp right out of the box, which is a rule for all BeaverCraft tools. Longer handle allows you to work either with one hand or with both hands. Ergonomic shape of the handle makes possible to carve longer and don't get tired.

SK5R - Spoon Carving Knife Deep Cut Bevels Right side edge

Leather sheath available

Left-handed version available

- Blade length – 85 mm (3.35")
- Handle length – 200 mm (7.87")
- Total length – 255 mm (10.04")
- Handle material – Oak

Spoon Carving Knife Deep Cut Bevels Right-handed version will give you excellent carving experience for your spoon, kuksa and bowls projects. Double-side bevels allows you to make deep smooth cuts with slight and controlled moves. Longer handle allows you to work either with one hand or with both hands. Ergonomic shape of the handle makes possible to carve longer and don't get tired. This is the single side edge version of SK5 knife for your maximum comfortable carving experience. Left-handed option is available.

CARVING HOBBY KITS

The set contains SK1, SK2, SK2Long and SK3Long knives.

S12 – Starter Wood Carving Knife Set

The set contains C12, C2 and C8 knives.

S13 – Wood Carving Tool Set for Spoon Carving

Left-handed version available

The set contains C4M, C8 and SK1 together with a honing kit in a canvas tool roll.

S14 – Spoon Carving Set with Gouge

Left-handed version available

The set contains C4, SK2Oak and G7I/22.

S15 - Starter Chip and Whittle Knife Set

The set contains C6, C15 and C16 knives together with a honing kit in a canvas tool roll.

S16 – Figure Carving Set

The set contains C6 and C15 knives together with linden blocks.

S17 – Upgraded Spoon Carving Set

The set contains C13, C15 and SK1 knives together with a honing kit in a canvas tool roll.

S43 – Spoon and Kuksa Carving Professional Set

The set contains SK2, C4, K6L/15 and C3 together with a honing kit in a canvas tool roll.

S47 - Spoon Carving Set

The set contains G7L/22, C14 and SK5 together with a honing kit.

S48 - Wood Carving Tool Set for Spoon Carving

The set contains SK1, C1, C14 and C15 knives together with a honing kit in a canvas tool roll.

S49 - Spoon Carving with compact chisel Set

The set contains SK2, K6L/15, C1 and C11S together with a honing kit in a canvas tool roll.

Chisel Sets

SC01 - Gouge Wood Carving Tools Set

The set includes chisels and a short bent gouge, so with these tools you will easily carve a spoon, kuksa or any wooden sculpture. The tools are used to carve softwood as well as hardwood. The blades are

made of high carbon steel, well-sharpened and buffed. These woodcarving chisels are used for precise manual treatment only, excluding hammer and mallet use. The ash handles are lightly waxed to protect them whilst retaining its natural color and feel. All tools come razor sharp right out of the box, complete with a tool roll for better storage and transportation. The set also includes a leather strop and a polishing compound to make the tools sharp

again when needed. The set BeaverCraft SC01 includes:

- Compact short bent gouge K8a/14
- Compact straight rounded chisel K5/12
- Compact straight rounded chisel K9/10
- Compact straight V-profile chisel K12/02
- 4 Pocket Tool Roll TR4
- Leather strop & polishing compound

SC02 - Wood Carving Straight Chisel Set

The set consists of 4 compact chisels for making long and short lines, carving intricate geometric patterns of any complexity, carving letters, elements, and execution of undercutting works. The set

includes also storage for the tools and a leather strop with a polishing compound to keep the chisels sharp. Made from high carbon steel, the woodcarving chisels are ready to use right out of the package. The handles are made of Ash, oil impregnated. These woodcarving chisels are used for precise manual treatment only, excluding hammer and mallet usage. Go well both for soft and hard wood. The set BeaverCraft SC02 includes:

- Compact straight rounded chisel K5/12
- Compact straight rounded chisel K8/08
- Compact straight rounded chisel K9/10
- Compact straight V-profile chisel K12/02
- 4 Pocket Tool Roll TR4
- Leather strop & polishing compound

SC03 - Wood Carving Full Set of 7 Chisels

With this Chisels Set you will start from primary forming of the surface, will make deep scratches and shaping, remove greater or lesser amounts of wood, rough out the background for a large relief panel, make the ridges and

hollows, make relief carvings and also fine lines, and detail carving. The compact chisels are well-sharpened and buffed for immediate use with the edges that will stay sharp for many enjoyable hours of woodcarving. You can use such tools for both softwood and hardwood treatment. Handles are made of Ash and oil impregnated. The tools are used for precise manual treatment only, excluding hammer and

mallet use. The tools come in a 12-pocket tool roll for storage, transport, and protection of the edges. Includes a leather strop and a bar of polishing compound to make the tools razor sharp again when needed. The set BeaverCraft SC03 includes:

- Compact straight flat chisel single bevel K1/10
- Compact straight rounded chisel K5/12
- Compact long bent gouge K6L/15
- Compact straight rounded chisel K8/08
- Compact straight rounded chisel K9/10
- Compact short bent gouge K8a/14
- Compact straight V-profile chisel K12/02
- 12 Pocket Tool Roll TR12
- Leather strop & polishing compound

SC05 - Woodcarving Set of Palm Chisels

These 6 palm chisels will be a great option if you would like to try something new and learn new woodcarving techniques. What's more, all our tools are razor sharp and ready to use right out of the box and

the blades are made of high-quality high-carbon steel. With our ergonomic handles, you will not feel fatigue in the hands and will be able to work for hours on your project. The set BeaverCraft SC05 includes:

- Straight rounded palm chisel P5/12 (sweep #5)
- Straight rounded palm chisel P8/08 (sweep #8)
- Short bent gouge P8a/14 (sweep #8)
- Straight rounded palm chisel P9/10 (sweep #9)
- Straight V-profile palm chisel P12/02 (sweep #12)
- Flat palm chisel P1/04 (sweep #1)

G7L – Long Bent Gouge 7L

The long bent gouges are designed for cutting deep recesses and for hollowing out bowls and spoons. The woodcarving chisel is also particularly useful for cutting ornamentation, radii, and rounded surfaces. This razor-sharp high carbon steel blade is ready to use right out of the package. The woodcarving gouge is used for all types of wood. The handle is made from ash wood and stays comfortable even after hours of continuous carving. The excellent spoon bent gouge is handcrafted both for beginners and professional wood carvers.

G3 – Full-Size Straight Rounded Chisel Sweep 3

Straight rounded chisels Sweep #3 are a great solution for primary forming of the surface. Should be used for precise manual treatment only, excluding hammer and mallet use. Wood carving chisels BeaverCraft are razor sharpened and ready-to-use right out of the box. Made of high quality carbon steel. Has straight edge with single bevel. You can use such tools for both soft wood and hard wood treatment. Handle is made of Ash and oil impregnated.

G1 – Straight flat chisel G1

	10 mm (0.40")	G1/10
	16 mm (0.63")	G1/16
	21 mm (0.83")	G1/21
	24 mm (0.95")	G1/24

Straight flat chisels BeaverCraft are great solution for simple notches, reliefs and contours carving. Should be used for precise manual treatment only, excluding hammer and mallet use.

Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Has straight edge with single bevel. You can use such tools for both soft wood and hard wood treatment. Handle is made of Ash and oil impregnated. It is convenient to use and good for long usage.

Straight flat chisels BeaverCraft are handcrafted both for beginners and professional wood carvers.

K1/10 - Compact straight flat chisel single bevel

- Blade width – 10 mm (0.40")
- Total length – 192 mm (7.56")
- Blade length – 80 mm (3.15")
- Handle length – 115 mm (4.53")

10 mm (0.40") **K1/10**

BeaverCraft compact straight flat chisels sweep #1 are great solution for simple notches, reliefs and contours carving. Has straight edge with single bevel. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

K5/12 - Compact straight rounded chisel

- Blade width – 12 mm (0.47")
- Total length – 192 mm (7.56")
- Blade length – 80 mm (3.15")
- Handle length – 115 mm (4.53")

12 mm (0.47") **K5/12**

BeaverCraft compact straight rounded chisels sweep #5 are great solution for primary forming of the surface. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

K6L/15 - Compact long bent gouge

- Blade width – 15 mm (0.59")
- Total length – 192 mm (7.56")
- Blade length – 80 mm (3.15")
- Handle length – 115 mm (4.53")

15 mm (0.59") **K6L/15**

Compact long bent gouges sweep #6 is great for deep and continuous extract. Great for spoon, kuksa and bowls. Razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

K8/08 - Compact straight rounded chisel

- Blade width – 8 mm (0.31")
- Total length – 192 mm (7.56")
- Blade length – 80 mm (3.15")
- Handle length – 115 mm (4.53")

8 mm (0.31")

K8/08

BeaverCraft compact straight rounded chisels sweep #8 are to help you with deep scratches and shaping. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

K8a/14 - Compact short bent gouge

- Blade width – 14 mm (0.55")
- Total length – 192 mm (7.56")
- Blade length – 80 mm (3.15")
- Handle length – 115 mm (4.53")

14 mm (0.55 inches)

K8a/14

BeaverCraft compact short bent gouges sweep #8 is great for deep but precise extract. Great for spoon, kuksa and bowls. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

K12/02 - Compact straight V-profile chisel

- Blade width – 2 mm (0.08")
- Blade angle – 60°
- Total length – 192 mm (7.56")
- Blade length – 80 mm (3.15")

BeaverCraft compact straight V-profile chisels sweep #12 have 60° angle for deep and fine lines carving. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

K9/10 - Compact straight rounded chisel

- Blade width – 10 mm (0.39")
- Total length – 192 mm (7.56")
- Blade length – 80 mm (3.15")
- Handle length – 115 mm (4.53")

BeaverCraft compact straight rounded chisels sweep #9 are to help you with deep scratches and shaping. Shorter blade and more compact comfortable handle for your best carving projects. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

P8A/14 - Palm-size short bent gouge

- Blade width – 14 mm (0.55")
- Total length – 140 mm (5.51")
- Blade length – 75 mm (2.95")
- Handle length – 65 mm (2.56")

14 mm (0.55")

P8A/14

BeaverCraft palm-size short bent gouges sweep #8 is great for deep but precise extract. Great for deep details as well as spoon, kuksa and bowls. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

P9/10 - Palm-size straight rounded chisel

- Blade width – 10 mm (0.39")
- Total length – 140 mm (5.51")
- Blade length – 75 mm (2.95")
- Handle length – 65 mm (2.56")

10 mm (0.39")

P9/10

BeaverCraft palm-size straight rounded chisels sweep #9 are to help you with deep scratches and shaping at your fine cuts. Comfortable small handle lays comfortable and steady at any hand. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

P12/02 - Palm-size straight V-profile chisel

- Blade width – 2 mm (0.08")
- Blade angle – 60°
- Total length – 140 mm (5.51")
- Blade length – 75 mm (2.95")
- Handle length – 65 mm (2.56")

2 mm (0.08")

P12/02

BeaverCraft palm-size straight V-profile chisels sweep #12 have 60° angle for deep and fine lines carving. Comfortable small handle lays comfortable and steady at any hand. Wood carving chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. Should be used for precise manual treatment only, excluding hammer and mallet use. It is convenient to use and good for long usage.

P1/01-04, 10 - Palm-chisel straight flat

	1 mm (0.40")	P1/01
	2 mm (0.63")	P1/02
	3 mm (0.83")	P1/03
	4 mm (0.95")	P1/04
	10 mm (0.95")	P1/10

Palm-size straight rounded chisels sweep #1 are made for extremely fine straight cuts and finishings. Has straight blade with single bevel. Comfortable small handle lays comfortable and steady at any hand. Razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. It is convenient to use and good for long usage.

P5/12 - Palm-chisel straight rounded

<ul style="list-style-type: none"> • Blade width – 12 mm (0.47") • Total length – 140 mm (5.51") • Blade length – 75 mm (2.95") • Handle length – 65 mm (2.56") 		P5/12
---	---	--------------

BeaverCraft palm-size straight rounded chisels sweep #5 are aimed to help when you need the most accurate and sensitive cuts. Comfortable small handle lays comfortable and steady at any hand. Wood carving palm-chisels BeaverCraft are razor sharp and ready-to-use right out of the box. Made of high quality carbon steel. Sharpened and honed manually. You can use such tools for both softwood and hardwood treatment. Handle is made of Ash and oil impregnated. It is convenient to use and good for long usage.

BLADES
— ■ —

BC1 – Blade for Whittling Knife C1

- Total length – 120 mm (4.72")
- Cutting edge length – 60 mm (2.36")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

BeaverCraft offers an unbeatable blade for carving delicate curves and larger cuts. The general purpose carving blade for the C1 knife gives carvers a different approach to a detail or paring cut. The blade is great for whittling, marking, chip carving, general woodworking, and handicrafts. Its high-carbon steel is hardened and well sharpened. Designed by BeaverCraft.

BC2 – Blade for Bench Knife C2

- Total length – 105 mm (4.13")
- Cutting edge length – 40 mm (1.57")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

This straight blade is designed for removing heavier stock with a rounded durable point. Being super sharp, the blade allows cutting both soft and hardwood. The blade features high carbon steel. Designed by BeaverCraft.

BC3 – Blade for Sloyd Carving Knife C3

- Total length – 105 mm (4.13")
- Cutting edge length – 40 mm (1.57")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade for sloyd carving knife is beveled on both sides and it is good as all-purpose carving tool. Choosing this blade, you can perform chip carving, whittling, and detailing in some wood carving projects. The blade features high carbon steel. Designed by BeaverCraft.

BC4 – Blade for Whittling Knife C4

- Total length – 140 mm (5.51")
- Cutting edge length – 80 mm (3.14")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade for the C4 knife is designed for whittling, general woodworking, marking, and handicrafts. The straight blade can remove larger stock. The blade features high-carbon hardened steel. Designed by BeaverCraft.

BC5 – Blade for Bench Knife C5

- Total length – 110 mm (4.33")
- Cutting edge length – 50 mm (1.96")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade for knife C5 is used for marking, carving and utility purpose. Its more rounded point is very durable. The blade features high-carbon hardened steel and offers a superior sharpness, for all your crafting needs. Designed by BeaverCraft.

BC6 – Blade for Chip Carving Knife C6

- Total length – 95 mm (3.74")
- Cutting edge length – 25 mm (1")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0,08")

The blade for chip carving knife C6 is short and used to make both smooth and curved geometric shapes, cut out triangles, squares, lines, carve letters, caricatures, and create different intricate designs in wood and more. The blade features high carbon steel. Designed by BeaverCraft.

BC7 – Blade for Detail Knife C7

- Total length – 160 mm (6.3")
- Length of the cutting edge – 40 mm (1.57")
- Tang length - 68 mm (2.36")
- Blade thickness - 2 mm (0.07")

This blade for knife C7 has a fine point for making the very narrow cuts associated with detailing. The flexible blade is excellent for producing some works of fine detail and greater precision. Designed for very fine delicate cuts, this blade is a great for many woodcarving projects. Its high carbon steel features durability. Designed by BeaverCraft.

BC8 – Blade for Chip Carving Knife C8

- Total length – 105 mm (4.13")
- Cutting edge length – 35 mm (1.37")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

Designed to make geometric shapes, cut out squares, lines, carve letters, create designs in wood and more, this perfect - blade for chip carving knife C8 is made from edge-holding steel for smoother cutting and is ready to use right out of the package. Designed by BeaverCraft.

BC9 – Blade for Marking Knife C9

- Total length – 95 mm (3.74")
- Cutting edge length – 25 mm (1")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

This blade for woodcarving knife C9 is intended for marking lines for fine joinery layout work. It is also designed for geometric woodcarving, producing lines, which aids in making accurate cuts with chisel. The blade features high carbon steel. Designed by BeaverCraft.

BC10 – Blade for Geometric Carving Knife C10

- Total length – 105 mm (4.13")
- Cutting edge length – 40 mm (1.57")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

This blade for knife C10 is used mainly for geometric woodcarving, cutting geometric patterns in the wood, aligning the background with relief wood carvings and more. Its special beveled blade shape is great for performing both geometric wood carving and detail woodworking. The blade features high carbon steel. Designed by BeaverCraft.

BC10s – Blade for Geometric Carving Knife C10s

- Total length – 95 mm (3.74")
- Cutting edge length – 30 mm (1.18")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

With The blade for knife C10s, the woodworker can carve geometric shapes, patterns, cut out squares, triangles, lines, and carve letters, caricatures and more. Its high-carbon steel takes a razor-edge. Designed by BeaverCraft.

BC11 – Blade for Geometric Carving Knife C11

- Total length – 105 mm (4.13")
- Cutting edge length – 35 mm (1.37")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade for knife C11 is designed for making long and short lines and other geometric elements and for execution of undercutting works. Using this blade, a carver can perform different geometric wood carvings, letters cuttings with different complexity. The blade features high carbon steel. Designed by BeaverCraft.

BC11s – Blade for Geometric Carving Knife C11s

- Total length – 95 mm (3.74")
- Cutting edge length – 20 mm (0.78")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade for knife C11s is intended for geometric woodcarving, cutting out geometric patterns of any complexity, carving letters and more. The blade is small, but allows surgical precision in cutting. Its high carbon steel features durability. Designed by BeaverCraft.

BC12 – Blade for Skew Knife C12

- Total length – 95 mm (3.74")
- Cutting edge length – 20 mm (0.78")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0,08")

This blade for knife C12 is used for taking more vertical cuts where space is limited for a conventional whittling stroke. Made of high-carbon steel, the tool shank gives just enough to follow the contour of carving, eliminating the need to have a handful of traditional tools to finish a single profile. Designed by BeaverCraft.

BC13 – Blade for Whittling Knife C13

- Total length – 120 mm (4.72")
- Cutting edge length – 60 mm (2.36")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade for knife C13 is ideal for whittling, the removal thin layers of wood, delicate processing of hard-to-reach places due to the thin edge of the end of cutting part. Such a blade will cope perfectly with the thread in the areas of rounding. The blade is narrow and sharp, made of high-carbon hardened steel. The blade holds the sharpening well and allows you to carve soft and hard wood. Designed by BeaverCraft.

BC14 – Blade for Whittling Knife C14

- Total length – 120 mm (4.72")
- Cutting edge length – 60 mm (2.36")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade of knife C14 is designed for whittling tiny layers of wood, leveling the surfaces of various elements and backgrounds. This multifunctional plane blade is well suited for removing thin layers of wood and cutting. The tapered blade is made of hardened high-carbon steel, it keeps the sharpness during for a long time. Its sharpening angle allows to carve soft and hard wood. Designed by BeaverCraft.

BC15 – Blade for Whittling Knife C15

- Total length – 95 mm (3.65")
- Cutting edge length – 35 mm (1.37")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

This blade of knife C15 allows you to perform the most detailed cuts with the maximum control of each move. The tapered blade is made of hardened high-carbon steel, it keeps the sharpness during for a long time. Its sharpening angle allows to carve soft and hard wood. Designed by BeaverCraft

BC16 – Blade for Whittling Knife C16

- Total length – 115 mm (4.42")
- Cutting edge length – 50 mm (1.92")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade of knife C16 is made for rough whittling with minimum efforts applied. At the same time the tip allows making basic detailed works. The tapered blade is made of hardened high-carbon steel, it keeps the sharpness during for a long time. Its sharpening angle allows to carve soft and hard wood. Designed by BeaverCraft

BSK1 – Blade for Spoon Carving Knife 25 mm

- Total length – 110 mm (4.33")
- Cutting edge diameter – 25 mm (1")
- Tang length – 60 mm (2.36")
- Blade thickness – 2 mm (0.08")

The blade for spoon carving knife SK1 has the excellent U-shape for making detailed cuts or rounding out bowls and spoons, Kuksa or a rounded edge to add some detail to your project. The blade is deeply curved, edged all the way to the tip, and has a flat back for pushing with the thumbs. The blade features high carbon steel. Designed by BeaverCraft.

BSK2 – Blade for Spoon Carving Knife 30 mm

- Total length – 125 mm (4.92")
- Cutting edge diameter – 30 mm (1,18")
- Tang length – 65 mm (2.56")
- Blade thickness – 2 mm (0.08")

This blade for spoon carving knife SK2 is aimed at forming the hollows of spoons and bowls, cutting out kuksa or making rounded edges. The deeply curved, single-edged blade is sharpened all the way to the pointed tip. The blade features high carbon steel. Designed by BeaverCraft.

BUSHCRAFT KNIVES
— ■ —

BSH1 - Carbon Steel Bushcraft Knife Walnut Handle with Leather Sheath

- Total length – 270 mm (10.63")
- Blade length – 125 mm (4.92")
- Blade width – 30 mm (1.18")
- Handle length – 145 mm (5.71")
- Handle material – Walnut
- Sheath material – Cowhide leather

The knife has a smart handle design with a bit aggressive look. It is ergonomic and nonslip and provides optimal accuracy in use (your hand will not get tired, even after long bushcraft work). It comes with a genuine leather sheath for easy and safe carrying while hunting, fishing, or backpacking.

BSH2 - Carbon Steel Bushcraft Knife Walnut Handle with Leather Sheath

- Total length – 240 mm (9.45")
- Blade length – 105 mm (4.13")
- Blade width – 30 mm (1.18")
- Handle length – 135 mm (5.32")
- Handle material – Walnut
- Sheath material – Cowhide leather

The knife has a smaller but impressive razor out of carbon steel, which will be of great use even for kids, and in any area, you can put your mind to – it is suitable as a carving knife, cooking knife, or anything else you might be up to in the woods. It has a walnut handle with a leather cord, which is nice and easy to hold.

BSH3 - Carbon Steel Fixed-Blade Bushcraft Knife Walnut Handle with Leather Sheath

- Total length – 245 mm (9.64")
- Blade length – 120 mm (4.72")
- Blade width – 35 mm (1.38")
- Handle length – 125 mm (4.92")
- Handle material – Walnut
- Sheath material – Cowhide leather

Unlike other models of our bushcraft knives, this one is blued. This approach prevents rapid corrosion, allowing this bushcraft gear to be used in rainy or moist environments. It makes it an ideal tool for most tasks – from fieldwork in the wild to simple outdoor chores. The handle is made of noble walnut in an ergonomic design and provides a comfortable grip.

BSH4 - Carbon Steel Bushcraft Knife Walnut Handle with Leather Sheath

- Total length – 250 mm (9.84")
- Blade length – 125 mm (4.92")
- Blade width – 35 mm (1.38")
- Blade thickness – 3.5 mm (0.14")
- Handle length – 125 mm (4.92")
- Handle material – European Walnut
- Sheath material – Cowhide leather

This bushcraft knife guarantees effortless cutting and a firm grip with its robust carbon steel blade, rust-resistant coating, and ergonomic walnut handle. Its full-tang construction and jimping for finger traction make it perfect for heavy-duty tasks. Ideal for camping, hiking, and survival, it comes with a genuine leather sheath.

BSH5 - Compact Bushcraft Knife Walnut Handle with Leather Sheath

- Total length – 210 mm (8.26")
- Blade length – 95 mm (3.74")
- Blade width – 30 mm (1.18")
- Blade thickness – 2.5 mm (0.09")
- Handle length – 115 mm (4.52")
- Handle material – European Walnut
- Sheath material – Cowhide leather

This remarkable knife features a full-tang construction for strength and resilience. The hollow grind ensures precise cutting, while its compact size offers portability. Its razor-sharp blade withstands the toughest conditions. The European walnut handle provides optimal grip and comfort. It comes with a leather sheath for secure carrying and a striking backside for fire-starting.

BSH Kid – Kid-Safe Knife for Outdoor Activities

- Total length – 180 mm (7.08")
- Blade width – 24 mm (0.94")
- Blade thickness – 2.5 mm (0.1")
- Steel material – X50CrMoV15, 55 HRC
- Handle material – European walnut
- Sheath material – Cowhide leather

This full-tang knife is made for kids eager to learn knife skills in a secure and controlled manner. It boasts a rounded tip and a short, fixed blade, which reduces the risk of accidents. The ergonomic wooden handle, made of European walnut, fits small hands comfortably, ensuring a secure grip. The knife comes with a cowhide leather sheath, a belt loop, and a classic button lock, making it readily accessible during outdoor adventures.

AXES

AX1 - Compact Wood Hatchet for All Tasks and Purposes

- Total length – 300 mm (11.81")
- Head length – 140 mm (5.51")
- Blade width – 75 mm (2.95")
- Handle length – 240 mm (9.49")
- Handle material – Ashwood
- Sheath material – Cowhide leather

This hand-forged bushcraft axe is small in size but big enough to take care of all your needs – cut branches, split sticks, chop logs, fell trees, make crafts, or even create an outdoor shelter.

The tool demonstrates high performance in the field of green woodworking and carpentry. It is suitable for all household needs, camping, bushcraft, or long-distance expeditions.

The axe features an ultra-sharp blade made from advanced hardened carbon steel and a sturdy ash wood handle impregnated with linseed oil and wax. It comes with a sheath made from genuine leather and a belt loop to protect the edge.

AX2 - Compact Wood Carving Adze

- Total length – 295 mm (11.61")
- Blade length – 170 mm (6.69")
- Blade width – 60 mm (2.36")
- Handle material – Ashwood
- Sheath material – Cowhide leather

This wood carving adze is crafted from premium high-carbon steel and has a curved blade and ergonomic Ashwood handle to provide unmatched carving accuracy and comfort. It has a genuine leather sheath for storing and carrying, protecting the blade and ensuring it stays sharp and ready for your next project.

AX3 – Carving Axe with a Curved Blade

- Total length – 295 mm (11.61")
- Blade length – 170 mm (6.69")
- Blade width – 60 mm (2.36")
- Handle material – Ashwood
- Sheath material – Cowhide leather

This axe is the ultimate solution for various woodworking needs. It has a sharp curved blade designed to penetrate deep into the wood for efficient and precise cutting. Made of high-carbon steel, the blade is durable and maintains sharpness for a long time. Thanks to the ergonomic design of the Ashwood handle, you can work comfortably for extended periods. The axe comes with a cowhide leather sheath for safe storage and easy transportation.

LS1P1 – Dual-Sided Leather Paddle Strop

- Total length – 380 mm (14.96")
- Length of the leatherworking part – 230 mm (9.05")
- Working width of the leather – 80 mm (3.14")
- Base material – Ashwood

The LS1P1 Dual-Sided Leather Paddle Strop is aimed at keeping your blades at peak performance. The rough leather surface is used with P1 Polishing Compound to remove hardened steels. Includes a bar of P1 Polishing Compound designed to adhere to the strop by rubbing the bar on the leather surface of the strop.

LS6P1 - Small Dual-Sided Leather Paddle Strop

- Surface – cowhide leather
- Length of the leather part – 240 mm (9.45")
- Total length – 370 mm (14.57")
- Total width – 50 mm (1.97")
- Base material – Ashwood

This sharpening strop is comfortable to use and to keep your blades exceptionally sharp. The double-sided leather paddle strop is designed for honing and keeping knives' and tools' blades razor sharp. Simply strop the blade away from the cutting edge on both sides to maintain the factory edge. The strop has a flat and sturdy construction. The base is made from ashwood, firm and smooth.

LS5P1 - Paddle Strop for Spoon Knives

- Surface – cowhide leather and sandpaper
- Length of the leather/sandpaper part – 170 mm (6.69")
- Total length – 310 mm (12.2")
- Total width – 70 mm (2.76")
- Base material – Ashwood

With the LS5P1 strop designed specifically for hook knives, achieve a razor-sharp edge on your curved blades. Utilize the leather strop side along with the provided polishing compound to attain the keenest edge imaginable. The coarse leather surface effortlessly eliminates hardened steel, ensuring the blades stay in top-notch condition.

Each LS5P1 strop comes complete with a bar of BeaverCraft polishing compound. As a bonus, two spare sandpaper sheets are included for your convenience.

LS4P1 - One-Side Leather Paddle Strop Block

- Surface – cowhide leather with polishing compound on
- Length – 225 mm (8.60")
- Width – 65 mm (2.50")
- Base material – Ashwood

The LS4 leather strop with a green polishing compound will make your knife razor sharp. The strop is ready to use right out of the box! Using the high quality honing strop, you'll get your knives extremely sharp. Use strop leather to sharpen the blades of all the knives & woodworking tools you have.

LS4CP1 - One-Side Leather Paddle Strop Block

- Surface – cowhide leather
- Length – 225 mm (8.60")
- Width – 65 mm (2.50")
- Base material – Ashwood

A one sided stropping paddle which is meant to help comfortable sharpening and buffing processes while using a green paste attached as well. The extra paste for polishing will make the process much easier and more effective so for buffing it will be an indispensable helper.

LS2P1 – Leather Strop for Honing

- Length – 200 mm (7.87")
- Width – 75 mm (2.95")
- Thickness – 4-5 mm (0.16-0.2")
- Material – cowhide leather

If any of your knives, chisels, or knife cuts or your razor are getting worse, just use the leather belt with polishing compound and make it razor sharp again. Comfortable and easy to use, the leather belt with polishing compound is also go well for sharpening kitchen knives, razors, hunting fishing knives, dagger, woodcarving knives and at maximum sharpness. This item is pleasant and it doesn't take much space.

LS2P11 – Leather Strop for Honing

- Length – 200 mm (7.87")
- Width – 75 mm (2.95")
- Thickness – 4-5 mm (0.16-0.2")
- Material – cowhide leather

The stropping kit over here offers two individual buffing compounds in a complex with the leather strop. The green paste works perfectly for polishing the razors so you will be happy to see your own reflection after stropping. The white paste is a little rougher and can be used for polishing as well as honing - making the blades smoother if there are any inconsistencies after a tough working period. The leather piece has two sides, smooth and rough. Both can be used for stropping, the smooth needs to be worked with a paste whereas the rough one can be used without it to buff your blades.

LS7P03 - Long Leather Strop for Honing

This set has 3 individual polishing compounds and 1 leather strop that will allow you to do all the needed work with your instruments to reach perfection. This knife sharpener strop has two leather sides, one more smooth and one more rough. The size is 75x310mm! All this for your knives to get sharp and shining.

LS3 - Long Leather Strop for Honing

- Length – 30-40 cm (11.8-15.7")
- Width – 50 mm (1.97")
- Thickness – 2-4 mm (0.08-0.16")
- Material – cowhide leather

This LS3 Long Leather Strop for Polishing is designed to make your knives, chisels or any other cutting tools sharp again when they are getting worse and remove hardened steels. Turn the strop over to the smooth leather surface for a high-sheen, razor-sharp finish. The strop for polishing is made from cowhide.

APRONS

AP1 - Green Canvas Apron

Apron made out of green durable sustainably sourced canvas, has a lot of different pockets to be comfortable for carving anywhere and having your tools with you. Cross-back straps make it easier on your neck so you can work all day long. This apron is additionally supported by grommets and rivets so it will live longer and protect you and your clothes while working. It has one universal size that will fit everyone - 27 inch wide and 34 inch long for full coverage. The apron is fluid-resistant so it will keep the grease and dirt off of your clothes.

AP2X - Genuine Leather Apron Brown

An apron made out of brown genuine leather will be thick enough to protect you while working and give you the coverage that you need to secure your clothes. It has pockets so you'll be able to have all the instruments required close at hand. Smooth texture of the leather will not be too heavy on your body so it'll present you with an opportunity to move freely and work as you like without limiting your movements whatsoever. Leather doesn't get dirty itself and any grease or paint can be washed off.

AP3X - Genuine Leather Apron Black&Brown

An apron before you has been made out of the combination of brown and black genuine leather. Brown leather is the material for the bigger part of the apron whereas the black leather emphasizes the pockets and straps of the apron. Having big pockets is important for any equipment that you want to wear while working - having all instruments close at hand is very practical. The leather doesn't weigh a lot and doesn't restrict your movements so you'll be able to work comfortably. The grommets and rivets will make this apron last long and serve you well.

AP4 - Brown canvas with Leather Whittling Apron

Apron out of a brown canvas with leather pieces on pockets as well as at the top of apron. It is fluid-resistant so it won't be difficult to wash the dirt, grease or paint off of it and it will protect your clothes. The apron

isn't too tight, it won't restrict your movements but will be a good additional pair of hands - having pockets is greatly important for a workshop's apron since it holds the needed instruments close. With additional support in the forms of rivets and grommets you will enjoy this apron for a long time.

AP5 - Chest protector Leather Brown

When working on wood carving small projects it is often a need to push the wood blank against your chest. So to protect your chest, your close, make the carving process more convenient and simply better

looking we designed this chest protector. Thick layer of genuine leather together with convenient and reliable hardware gives excellent carving experience and increases safety of the process tremendously.
