

What will **YOU**  
**CREATE** with  
FlowCast?

30L Kit Shown

PERFECT FOR THICK POURS

**13 to 38 mm Thick per Layer**

GOODBYE BUBBLES

**Excellent Air Release**

LIQUID GLASS

**Cures Water-like, Crystal Clear**

GOODBYE SMELLY EPOXIES

**Extremely Low Odor**

FlowCast® is the next generation in clear casting resin! It's thinner, clearer, and contains more bio-renewable content. When the two parts are combined, it hardens to a crystal clear, durable finish to a maximum thickness of 38 mm". Use FlowCast® epoxy by itself for a crystal clear finish or add our pigments to create custom colours and effects.

FlowCast® can be worked using the same tools you already have for woodworking such as a lathe, table saw, or belt sander, leaving you thousands of possibilities to create beautiful projects

(Also available in 600L and 3000L kits)
