**Large Flecks of Glitter**

CREATE CUSTOM EFFECTS

**Available in 12 Colors**

Contains 22g

Polyester Color Glitters are precisely cut from premium vacuum-metalized polyester film. The brilliant nature of these specialty glitters are compatible with and naturally complement EcoPoxy resins.

Mix EcoPoxy Glitters with a thin topcoat, such as UVPoxy, as they remain suspended and visible on the topmost layer, giving your project a lustrous sparkle!

Use glitters to create stunning art projects, river tables, charcuterie boards, jewelry, etc.

See how our esteemed makers have used glitters to create inspirational art pieces on our website.
